

HOLOSUSTAIN (2019 -2022) - Sea CUCUMBERS AS NOVEL RESOURCE IN THE NORTH ATLANTIC

web site: www.holosustain.no

Objectives:

- **Initiate a cluster-type platform** to function as knowledge hub on sea cucumber value chains at International level.
- Create a critical mass of interested RTD and Industrial players to apply for international and national funding opportunities and lobby in front of relevant authorities for inclusion of the resource into strategic guidelines.
- **Organize two collaborative international workshops (one in Iceland and one in Norway)** with participation of external stakeholders from the corresponding legislative and resource management local/national authorities for exchange of relevant strategic innovation information and methodological experience on sustainable utilization of sea cucumbers from the North Atlantic.
- **Report to NORA guidelines for strategic innovation objectives** in the region (based on systemic bibliography reviews and consortium expertise) that could be implemented in further value chain development
- **Establish common collaborations and international market opportunities** for the new products.

Organization of the 2nd HOLOSUSTAIN workshop – International, mixed (digital and physical) event

- The event will be recorded through Zoom and recording uploaded on the project website/ section 2nd HOLOSUSTAIN workshop/ by the end of next week
- There is a poster session at the end of the second session - 14,20-14,35h CEST
